Program At A Glance...

START is a non-profit afterschool program designed to cultivate character and academic skills necessary for lifelong success through community-driven, experienced-based learning opportunities. Participants are middle/high school students ages 11 – 19 with a connection to Miami, Florida’s West Coconut Grove community.

Why Is START Essential?

West Coconut Grove as a community continuously vies with obstacles that hinder students from succeeding. Impediments include: poverty, violence, segregation, and underfunded schools and programs. Additionally, the youth must now compete with a new foe as they experience the negative consequences of gentrification. These barriers hamper the psychological development of our community’s youth.

START’S model is based upon leading research from the fields of education and psychology.
